## Management's Discussion and Analysis (Audited Financial Statements)

### Thailand's Economic Outlook and Commercial Banking Industry

The Thai economy in 2025 expanded by 2.4 percent, slowing down from the previous year's growth of 2.9 percent. The primary driver was a deceleration in private consumption due to waning consumer confidence, fueled by concerns over a sluggish economic recovery and elevated household debt. Additionally, the tourism sector recovered more slowly than anticipated due to a decline in Chinese tourist numbers, which hindered the service sector from reaching its full potential. In contrast, exports improved as shipments were accelerated during the first half of the year before US import tax measures took effect. While private investment showed signs of recovery, it continued to face structural challenges impacting competitiveness. Meanwhile, government spending expanded in line with stimulus measures implemented through various projects. Regarding economic stability, the headline inflation rate for 2025 entered negative territory at -0.1 percent. The Monetary Policy Committee (MPC) gradually reduced the policy rate throughout 2025 a total of 4 times, each by 0.25 percent. This resulted in the policy rate dropping from 2.25 percent per annum to 1.25 percent per annum by the end of December 2025. The moves aimed to ensure conducive financial conditions to support business adjustments, alleviate debt burdens for vulnerable groups, and bolster future economic growth.

Thai commercial bank loans in 2025 contracted slightly compared to the previous year. This was primarily driven by a decline in SME lending, as credit risk for the sector remained high. Deposits increased slightly, specifically in savings accounts, following the downward interest rate trend as financial institutions managed their funding costs. Non-performing loans (NPLs) rose in line with economic conditions and deteriorating SME credit quality. However, expected credit loss (ECL) of commercial banks was adequate to cover potential future risks.

As regards 2026, the Thai economy is expected to continue growing at a more moderate pace. Key factors include the economic slowdown of trading partners, geopolitical conflicts, household debt problems, and domestic political uncertainty. Accordingly, the Office of the National Economic and Social Development Council (NESDC) forecasts that the Thai economy in 2026 will grow in the range of 1.5-2.5 percent, with a median projection of 2.0 percent.

## Operating Results for the Fourth Quarter and Full Year of 2025

### Performance Overview

In the fourth quarter of 2025, the Company and its subsidiaries' net profit according to the consolidated financial statements amounted to 2,022 million baht. This was mainly due to the operating results of the important subsidiary and associated companies as follows:

- Ratchthani Leasing Public Company Limited had a consolidated net profit of 315 million baht
- Thanachart Insurance Public Company Limited had a net profit of 220 million baht
- Share of profit from investments accounted for under equity method – associated companies and joint venture was 1,453 million baht

As a result, **net profit attributable to the Company amounted to 1,894 million baht, a decrease of 185 million baht or 8.90 percent from the previous quarter.** This was mainly due to a decline in net insurance / life insurance income as a result of higher estimated claims from the flooding incident in Hat Yai area, together with a seasonal decrease in dividend income. In addition, share of profit from investments in associated companies decreased in line with their operating performance. However, expected credit losses decreased as a result of improved asset quality of a subsidiary company.

Earnings per share (EPS) of the Company in this quarter were 1.81 baht, a decrease from 1.98 baht in the previous quarter. Return on Average Assets (ROAA) and Return on Average Equity of the Company's shareholders (ROAE) were at 5.24 and 9.51 percent, respectively.

**For the year 2025, the Company and its subsidiaries' net profit according to the consolidated financial statements amounted to 8,264 million baht.** This was primarily due to the operating results of the important subsidiary and associated companies as follows:

- Thanachart Insurance Public Company Limited had a net profit of 1,077 million baht
- Share of profit from investments accounted for under equity method – associated companies and joint venture was 5,707 million baht

As a result, **net profit attributable to the Company amounted to 7,750 million baht, an increase of 1,095 million baht or 16.45 percent** from the previous year. Main factors were from higher net insurance / life insurance income and an increase in dividend income from the Company's strategy to expand investments in financial businesses. In addition, share of profit from investments in associated companies increased, supported by their stronger operating performance. Furthermore, impairment losses on repossessed vehicles and expected credit losses continued declining, reflecting the improved asset quality of a subsidiary company.

Earnings per share (EPS) of the Company in 2025 were 7.39 baht, an increase from 6.35 baht in the previous year. Return on Average Assets (ROAA) and Return on Average Equity of the Company's shareholders (ROAE) were at 5.28 and 10.06 percent, respectively.

- Net investments amounted to 19,893 million baht, an increase of 566 million baht or 2.93 percent. This was mainly due to an increase in investment proportion of debt and equity instruments, although part of the investments was transferred to investments in associated companies.
- Investment in associated companies and joint venture amounted to 66,964 million baht, an increase of 5,024 million baht or 8.11 percent. This was mainly due to the strong operating performance of associated companies as well as the increased equity stake in MBK and PRG.

In addition, the capital requirement for credit risk increased slightly as a result of reinsurance-related exposures associated with the flooding incident in the Hat Yai area. Nevertheless, the capital fund of the company remained well above the OIC's minimum requirement of 140.00 percent.
